04 Add Devices

1. Open Zosi Smart App, login and click “+” to add device, select C513.
2. Scan the device QR code or enter the device UID manually and then click “Confirm”.
3. Click “Add an unconnected device” and setup WiFi on the device information interface.
4. Select WiFi and enter the corresponding password.

NOTE: The device only supports 2.4GH WiFi.

Click “Next” and point the camera lens at the QR code generated on the phone to scan.

5. Click “Next” after hear the voice prompts “Wireless configuration succeed”, “Wireless Connecting, please wait”, “Wireless Connection Succeed”, click “confirm” in the pop-up box and click “Complete” in the “Added Successfully” interface.

NOTE: If the device fails to be added, please check the following points:

1. Check whether the device is powered on.
2. Check whether the WiFi password is entered correctly.
3. Confirm the network connected to the mobile phone and the device can access the Internet normally.
4. Confirm whether the network has firewall restrictions, which may cause the device fails to connect to our company's server normally, and causing the device to be offline.
5. Please reset the device and reconfigure the network if none of the above methods work. Insert the reset needle into the reset hole of the device for 5 seconds, and then add the device again according to the above steps.

In addition, you can also add devices via AP connection.

Please scan the QR code link below to watch the operation video.

05 Installation Notes

07 FAQs

1.Q: Why can't I add the device by local search?

Please make sure the device and mobile phone are in the same LAN. If you can't make both of them in the same LAN, please enter the device UID manually to add the device.

2.Q: Why is the device disconnected?

Please check whether the device is connected to the network. Whether the router is working normally. Whether the function of 'Obtain IP address automatically' is chosen or not.

3.Q: Why can't I find the video recording files?

Please check whether the SD card is damaged. Whether the date of the searched file is valid. Whether the time of the device system is correct.
